PCT/SE 2003/001291

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 4 and 22 mention that drive unit (14) is arranged for rotation of the tilt (5) relative to the wrist housing (9). It seems that the drive unit (14) is only arranged for rotation of the part (6b) to support the tool holder.
